The total cost basis for each security position and the unrealized gain/loss are provided solely for your convenience and may not be used for tax purposes or otherwise relied upon. If you have questions related to the tax treatment of your investments, please consult your tax advisor. Unrealized gain/loss total reflects only those positions for which a cost basis is available or has been provided. J.P. Morgan has not, and cannot, validate the cost basis of positions reported by you or your agent, and are displayed solely for your convenience. Information on this statement related to cost and gain/loss calculations does not include adjustments for wash sales that may have occurred on transactions pending settlement. These wash sale adjustments, if any, will be reflected on your next statement.

For Mutual Funds, itemized cost basis displays each purchase, the aggregation of long term and short term investments, and/or the aggregation of long term and short term positions which origination cannot be determined, noted as 'Other'. For Mutual Funds, Market Value vs. Purchases is provided to assist you in comparing your total purchase, excluding reinvested distributions, with the current market value of the position. For Mutual Funds which you choose not to reinvest distributions, 'Cumulative Cash Distributions' is displayed to assist you in monitoring the position. This Cumulative Cash Distributions will only reflect cash distributions made after June 1, 2018. Investment Gain/Loss calculates the difference between your cost of Purchases from the current value of the fund, plus Cumulative Cash Distributions. In any Mutual Fund tax lot is noted 'Other' or cost basis is not available. Investment Gain/Loss will display 'Not Available.'

Investment Gain/Loss display is for informational purposes only as does not reflect your total unrealized gain or loss, nor should it be used for tax purposes.

ALTERNATIVE INVESTMENTS

Investments referred to as "Alternative Investments" include, but are not limited to, direct participation programs, private equity investments, pooled private investments (such as limited partnerships and limited liability companies), non-publicly traded real estate investment trusts, private debt and hedge funds. While these investment types are each different, they do share some common characteristics such as: they are generally illiquid securities that are not listed on any exchange; there is a limited or no secondary trading market for these securities; and, there are typically restrictions on the timing and availability for redemptions. Additionally, private investment contracts, which would include most Alternative Investments, are ineligible for SIPC protection. Valuations of these investments are difficult to obtain and verify. The valuations of these investments presented on this statement have been obtained, unless otherwise noted, from the management, administrator or sponsor of each program (collectively, "Management"), or from a third-party vendor. These valuations have not been independently verified by J.P. Morgan Securities LLC ("JPMS") and do not represent the actual terms at which transactions or securities could be bought or sold or new transactions could be entered into or the actual terms on which existing transactions could be liquidated as of the date of this statement. Values are estimates only and may represent a value as of a date no greater than 18 months prior to the date of this statement. If an estimated value is not provided, valuation information is not available. In some instances, the valuations reflected on this statement may represent original cost, which information may or may not have been provided by Management or the third-party vendor. Valuations are provided for information purposes only and are intended solely for your own use. Please contact us if you wish to obtain additional or more specific information regarding the source(s) of the valuations. Alternative Investments may be reflected on your statement even though they may be held by a third party unaffiliated with JPMS. In such cases, unless JPMS otherwise agrees, JPMS has no responsibility for the verification, valuation, safekeeping or management of those assets.

In as much valuations may have been provided by Management of any program, you should review the operative documentation for each investment for the specific valuation methodology used by Management of that investment. JPMS expressly disclaims any responsibility for (1) the accuracy of the information and the methodology used by the Management in deriving valuations; (2) any errors or omissions in compiling or disseminating the valuations; and, (3) any use to which the valuations are put.

SPECIFIC NOTICE FOR RETIREMENT ACCOUNTS: In the case of Alternative Investments, the annual fair market valuations ("FMV") of your account assets are reported by JPMS based on the best information available to JPMS (or its vendor) as of December 31 of the reporting year. If a more accurate valuation is subsequently obtained, the information reported to the IRS may differ from that reported to you on the earlier date and the adjusted value may affect various calculations including, but not limited to, possible required minimum distributions ("RMD"). If you are subject to a RMD, JPMS may notify you of the adjusted value. Additionally, certain Alternative Investments (e.g., private equity funds) may require capital calls of their investors. If capital calls are required in connection with assets held by your retirement account, the funds to meet such calls must be paid from your retirement account. The preceding information should not be construed as tax or investment advice. Please consult your tax or investment advisor for questions concerning your tax or financial situation, including any questions regarding the effect of these characteristics of Alternative Investments.

Special Notice for DPP and REIT Securities: DPP or REIT securities are not listed on a national securities exchange, are generally illiquid and, even if a customer is able to sell the securities, the price received may be less than the per share estimated value provided in the account statement.

LARGE TRADER REPORTING

A "large trader" is a legal entity or natural person who, directly or indirectly, through the exercise of investment discretion, effects transactions in the National Market System (NMS) securities that equal or exceed either:

- 2 million shares or \$20 million during any calendar day; OR
- 20 million shares or \$200 million over any calendar month.

The U.S. Securities and Exchange Commission (SEC) Rule 13h-1 Large Trader Reporting System requires U.S. and non-U.S. market participants who meet the definition of large trader to:

- File an electronic Form 13H with the SEC (via EDGAR) to obtain a large trader identification number (LTID); and
- Promptly disclose to U.S. broker-dealers that execute trades or carry accounts for the large trader, their LTIDs and the accounts to which the LTIDs apply.

If you are a large trader and have completed a Form 13H, you will receive an LTID from the SEC. In order to ensure that LTID's are captured and reported as required under the SEC rule, you are required to promptly report your LTID to us and identify each account to which the LTID should be applied.

EXTENDED HOURS TRADING RISK DISCLOSURE

You should consider the following points before engaging in extended hours trading. "Extended hours trading" means trading outside of "regular trading hours." "Regular trading hours" generally means the time between 9:30 a.m. and 4:00 p.m. Eastern Standard Time.

Risk of Lower Liquidity. Liquidity refers to the ability of market participants to buy and sell securities. Generally, the more orders that are available in a market, the greater the liquidity. Liquidity is important because with greater liquidity it is easier for investors to buy or sell securities, and as a result, investors are more likely to pay or receive a competitive price for securities purchased or sold. There may be lower liquidity in extended hours trading as compared to regular market hours. As a result, your order may only be partially executed, or not at all.

Risk of Higher Volatility. Volatility refers to the changes in price that securities undergo when trading. Generally, the higher the volatility of a security, the greater its price swings. There may be greater volatility in extended hours trading than in regular market hours. As a result, your order may only be partially executed, or not at all, or you may receive an inferior price in extended hours trading than you would during regular market hours.

Risk of Changing Prices. The prices of securities traded in extended hours trading may not reflect the prices either at the end of regular market hours, or upon the opening the next morning. As a result, you may receive an inferior price in extended hours trading than you would during regular market hours.

Risk of Unlinked Markets. Depending on the extended hours trading system or the time of day, the prices displayed on a particular extended hours trading system may not reflect the prices in other concurrently operating extended hours trading systems dealing in the same securities. Accordingly, you may receive an inferior price in one extended hours trading system than you would in another extended hours trading system.

Risk of News Announcements. Normally, issuers make news announcements that may affect the price of their securities after regular trading hours. Similarly, important financial information is frequently announced outside of regular trading hours. In extended hours trading, these announcements may occur during trading, and if combined with lower liquidity and higher volatility, may cause an exaggerated and unsustainable effect on the price of a security.

Risk of Wider Spreads. The spread refers to the difference in price between what you can buy a security for and what you can sell it for. Lower liquidity and higher volatility in extended hours trading may result in wider than normal spreads for a particular security.

IMPORTANT INFORMATION REGARDING PURCHASES INDICATED AS AVERAGE PRICE

Your orders are processed in either (1) one execution at the confirmed price or (2) more than one execution, in which case the confirmed price is an average price. Please contact your J.P. Morgan representative for details regarding actual prices.

EDELIVERED TRADE CONFIRMATIONS

As a reminder, if you've elected to receive trade confirmations by electronic delivery, you can find current and past copies online in the Trade Confirmations section under Statements & Documents. You can also find disclosures and important information about those trades, via a link on that page titled "See important disclosures for your confirmations".

CUSTOMER FREE CREDIT BALANCES

For accounts that are held at JPMS, customer free credit balances may be used in this firm's business subject to the limitation of 17CFR Section 240.15c3-3 under the Securities Exchange Act of 1934. You have the right to receive from us in the course of normal business operation, upon demand, the delivery of:

- any free credit balances to which you are entitled
- any fully-paid securities to which you are entitled
- any securities purchased on margin upon full payment of any indebtedness to us

For clients enrolled in a sweep program, the balance in any bank deposit account or shares of any money market mutual fund in which you have a beneficial interest can be withdrawn or liquidated on your order and the proceeds returned to your securities account or remitted to you.

If this is a margin account and we maintain a special memorandum account for you, this is a combined statement of your general account and a special memorandum account maintained for you under Section 220.6 of Regulation T issued by the Board of Governors of the Federal Reserve System. The permanent record of this separate account, as required by Regulation T, is available for your inspection.

Unless we hear from you to the contrary, it is our understanding that any free credit balances in your account are being maintained to facilitate your intention to invest such amounts through us.

MARGIN ACCOUNT REMINDERS

If you own a margin account, we would like to remind you that:

Securities and other assets in your account are our collateral for any margin loan made to you. If the securities and other assets in your account decline in value, so does the value of the collateral supporting your loan, and, as a result, we can take action, such as issue a margin call and/or sell securities or other assets in any of your accounts held at J.P. Morgan Securities LLC to maintain the required equity in your account. It is important that you fully understand the risks involved in trading securities on margin. These risks include the following:

- You can lose more funds than you deposit in your margin account.
- We can force the sale of securities or other assets in your account(s).
- We can sell your securities or other assets without contacting you.
- You are not entitled to choose which securities or other assets in your account(s) are liquidated or sold to meet a margin call.
- We can increase our "house" maintenance margin requirements at any time and are not required to provide you with advance written notice.
- You are not entitled to an extension of time on a margin call.

Further, if you have a margin account with us, as permitted by law we may use certain securities in your account for, among other things, settling short sales and lending the securities for short sales, and as a result may receive compensation in connection therewith. If you carry a margin balance, your account statement will reflect the current annual interest rate applicable to your margin loan. Please review the current rate, as under certain circumstances the rate may change without advance notice. If you have any questions or concerns about your current interest rate, please speak to your J.P. Morgan representative.

If you are a customer with a margin account, you have consented to our right (to the extent permitted by applicable law) to use, lend or pledge any securities held by J.P. Morgan Securities LLC in your margin account. In certain circumstances, such loans or other use may limit, in whole or in part, your ability to receive dividends directly from the issuing company and/or your right to exercise voting and other attendant rights of ownership with respect to the loaned, sold or pledged securities. Such circumstances include, but are not limited to, loans of securities that you own in your margin account that continue over record dates for voting purposes and ex-dividend dates for dividend distributions. If you do not receive dividends directly from the issuing company, you may receive payments-in-lieu of dividends, which could cause you to lose the benefit of the preferential tax treatment accorded to dividends.

For questions, please contact us using the information provided on the front of this statement.

Messages (continued)**IMPORTANT INFORMATION ABOUT AUTOMATIC REINVESTMENTS**

Automatic Reinvestment transactions excluding those conducted by DTC or in open ended mutual funds are processed by J.P. Morgan Securities LLC (JPMS) on an agency basis.

JPMS provides you with the ability to enroll in a program to re-invest any and all dividend, capital gains and return of capital distributions (collectively "Distributions") for securities eligible for participation (the Program). By participating in the Program, all dividends and capital gains distributions paid on eligible accounts or individual securities you have selected will automatically be reinvested into the shares of the same security. The important terms of the Program include:

- **Voluntary Participation.** Participation in the Program is voluntary and you may modify or discontinue your participation at any time. You may enroll by specifying individual securities or have all eligible securities in your account participate in the Program; modify your elections; or unenroll from the Program through the website or by contacting your PCA or FA.
- **Trade Execution.** With the exception of open ended mutual funds, provided you are enrolled in the Program prior to the record date, JPMS reinvests the Distributions from an eligible security on the pay date of the Distribution, at an average weighted price. For certain securities, reinvestment may occur through the Depository Trust Company (DTC), which may be later than the pay date. There may be a difference in price depending on whether the Program trade is made through J.P. Morgan or DTC. These transactions will post to your account when the shares are made available to JPMS by DTC and will be reflected on your statement.
- **No Fees.** No commission or fee are charged for Program trades.
- **Fractional Shares.** JPMS will credit to your account the number of shares equal to the amount of your funds to be reinvested in a particular security divided by the purchase price per share. If made available for your account, participation in the Program may give you interests in fractional shares of securities, which JPMS calculates to five decimal places. You will receive dividend payments proportionate to your partial share holdings.
- **Confirmation of Transactions.** All Program trades will be reflected on monthly account statements. You will not receive separate immediate confirmations for Program trades. You may request the details of any Program trade by contacting JPMS. Transactions that are not part of the Program will continue to receive confirmations contemporaneously with the trade.
- **No Recommendation.** The inclusion of any security in the Program is not a recommendation by JPMS to buy, hold or sell such security. Participation in the Program does not assure profits on your investments and does not protect against loss in declining markets.
- **Eligibility.** Generally, all brokerage accounts are eligible for participation as are most equities, open ended mutual funds, closed end funds and ETFs. Any exclusions will be identified at the time you are enrolled.
- **Program Changes.** Program participants will be notified in advance if there are any material changes to the Program though no notice may be given if there are changes to the eligibility of any particular security.

UPDATES TO THE GUIDE TO INVESTMENT SERVICES AND BROKERAGE PRODUCTS PART 2
PRODUCTS AVAILABLE FOR BROKERAGE ACCOUNTS continued

- Under "G. Money Market Funds," in "Compensation J.P. Morgan receives from Money Market Fund Companies," under "12b-1 distribution fees" we updated the typical range of fees to 0%-0.60%.
- Under "G. Money Market Funds," in "Compensation J.P. Morgan receives from Money Market Fund Companies," under "Revenue sharing" we stated certain fund partners make additional payments to us or our affiliates in certain sales channels based on overall sales and/or assets.
- Under "G. Money Market Funds," in "Compensation J.P. Morgan Securities LLC receives from Money Market Fund Companies," under "Conflicts of interest," we stated there will be an incentive to promote and recommend those funds whose sponsors make significant payments.
- Under "H. Exchange-Traded Products," in "Description," we added additional general detail about exchange-traded products and a new bullet stating exchange-traded notes (ETNs), similar to corporate bonds as debt securities issued by banks or financial institutions, generally do not pay interest but instead offer returns based on a reference index or benchmark, and unlike exchange-traded funds (ETFs), do not hold an underlying portfolio of assets.
- Under "H. Exchange-Traded Products," we added a section titled "Compensation J.P. Morgan receives from exchange-traded fund sponsors with subheadings "Revenue sharing" and "Conflicts of Interest."
- In "Revenue Sharing" we explained that certain actively managed ETF Sponsors make payments to JPMS or its affiliates based on the assets held by JPMS brokerage clients in the Sponsor's ETFs. These payments, known as revenue sharing, come from the Sponsor's revenues or profits, not the fund's assets, but the Sponsor's revenues or profits reflect fees paid to them by the fund. Starting December 2025, advisors will generally recommend only those actively managed ETFs whose Sponsors share revenue with J.P. Morgan, except for certain ETFs eligible for recommendation before this date. JPMS receives up to 15% of each ETF's management fee, capped at 0.15% of client assets in the ETF. Sponsors that participate in revenue sharing are listed at jpmorgan.com/active-etf-revenue-sharing.
- In "Conflicts of Interest" we highlighted that revenue sharing payments from actively managed ETF Sponsors to JPMS can vary annually, creating a conflict of interest. This is because there is an incentive to promote funds whose Sponsors make significant payments over those that do not. Additionally, JPMS faces a conflict when recommending ETFs that pay these fees instead of those that do not.

Messages (continued)**UPDATES TO THE GUIDE TO INVESTMENT SERVICES AND BROKERAGE PRODUCTS PART 3****PRODUCTS AVAILABLE FOR BROKERAGE ACCOUNTS continued**

- Under "H. Exchange-Traded Products," we added a section titled "Proprietary exchange-traded funds and affiliated service providers," stating affiliates of JPMS offer various services, including investment management, shareholder servicing, custody, fund accounting, administration, distribution, and securities lending, to J.P. Morgan ETFs, for which they receive fees. Consequently, J.P. Morgan earns more when clients purchase shares of J.P. Morgan ETFs compared to non-affiliated ETFs.
- Under "I. Annuities," in "Types of Annuities," under "Fixed Rate Annuities," we noted some fixed rate annuities may have a living benefit rider that can provide guaranteed lifetime income.
- Under "I. Annuities," in "Types of Annuities," under "Fixed Indexed Annuities" and "Buffered Annuities," we clarified that the downside protection is from market loss.
- Under "I. Annuities," in "Fees," under "Fixed Rate Annuities," we stated some fixed rate annuities may have a living benefit rider that can provide guaranteed lifetime income for an additional cost and also describe living benefit rider fees, which are charged to cover the cost of providing guaranteed lifetime income, can be as high as 0.95%, and can be charged daily, quarterly or annually and is assessed against the contract value or benefit base.
- Under "I. Annuities," in "Fees," under "Fixed Rate Annuities," we added a description of Market Value Adjustment (MVA), stating that MVA charges may apply if a contract value is withdrawn during the surrender charge period. These charges can be negative or positive, based on the difference between market rates at the time of contract issuance and withdrawal. MVA charges help offset potential losses the insurance company might face due to early liquidation of investments backing the annuity's guarantees and benefits.
- Under "I. Annuities," in "Fees," under "Buffered Annuities," we clarified that the spread typically will not result in negative performance.
- Under "I. Annuities," in "Fees," under "Advisory Fee-Based Variable Annuity Fees," we updated the link containing the fees and costs associated with our full-service advisory programs to chase.com/personal/investments/managed-account-disclosures.
- Under "I. Annuities," in "Paid to CIA and Private Client Advisors," under "New Sales and Additional Payments," we distinguished between fixed rate annuities with and without income riders, noting that commissions paid to Chase Insurance Agency (CIA) are up to 1.75% (2.00% in New York) without income riders and 1.45% at time of sale/0.90% trailing every subsequent year with income riders.
- Under "I. Annuities" and "J. Life Insurance," in "Restrictions," we clarified to indicate product availability is subject to residency requirements and may vary by location.

Pricing estimates do not constitute bids for any securities. Actual prices realized at sale may be more or less than those shown on your statement.

Unpriced Direct Participation Program (DPP) and Real Estate Investment (REIT) Securities: DPP and REIT securities are generally illiquid and the value of the security will, generally, be different

from its purchase price. Accurate valuation information is not available. The total cost basis for each security position and the unrealized gain/loss are provided solely as a general indication of performance and should not be used for tax purposes or otherwise relied upon without the assistance of your tax advisor. With respect to security positions received into your account, cost basis information, if any, has been provided by you. Further information is available upon request.

You may hold positions where the original cost basis has been adjusted to reflect amortization or accretion.

For Regulated Investment Companies or Dividend Reinvestment Plan sales, for which the average price method has been chosen, positions are closed out on a First-In-First-Out (FIFO) basis.

These statements are not official documents for income tax reporting purposes and should not be relied upon for such purposes, including determination of income, cost basis, amortization or accretion, or gain/loss. Such information, which may be inaccurate, incomplete or subject to updating, should be confirmed with your records and your tax advisor.

DIVIDEND INCOME: Dividends credited to your account may include capital gains, non-taxable dividends and/or dividends on foreign stock. You may wish to consult your tax advisor with regard to your tax liability on these dividends.

ESTIMATED ACCRUED INCOME, ESTIMATED ANNUAL INCOME AND ESTIMATED YIELD CALCULATIONS: The following calculation descriptions are provided for your reference. Please note that other factors may affect your specific calculations, so if you would like more information, please contact your J.P. Morgan representative or call us at the number on the front of this statement. In general, **Estimated Accrued Income** is calculated by multiplying the current coupon rate with the current face amount for the number of days since the bond's last interest payment. **Estimated Annual Income (EAI)** is calculated by multiplying either the current coupon rate or an estimated annual dividend (generally calculated by annualizing the most recent regular cash dividend) by the quantity of the security held. For balances other than sweep program balances, **Estimated Yield (EY)** is calculated by dividing EAI by the market value of the security. You should also know that: (i) the figures shown in this statement are estimates based on mathematical calculations using data obtained from outside sources; they are provided for informational purposes only, and are not a projection or guarantee of future returns. (ii) because prices of securities, coupon and dividend rates are subject to change at any time, these estimates should not be relied upon exclusively for making investment, trading, or tax decisions. (iii) because different asset types (e.g., equities versus fixed income securities) tend to have different investment characteristics, these estimates should not be compared across asset types; (iv) EAI and EY for certain types of securities might include return of principal or capital gains, in which case the EAI and EY would be overstated. There is no guarantee that your investments will actually generate the EAI or EY presented, and your actual income and yield might be higher or lower.

IMPORTANT INFORMATION REGARDING AUCTION RATE SECURITIES (ARS): ARS are debt or preferred securities with an interest or dividend rate reset periodically in an auction. Although there may be daily, weekly and monthly resets, there is no guarantee that there will be liquidity. If there are not enough bids at an auction to redeem the securities available for sale, the result may be a failed auction. In the event of a failed auction, there is no assurance that a secondary market will develop or that the security will trade at par or any other price reflected on statements and online. Accordingly, investors

should not rely on pricing information appearing in their statements or online with respect to ARS. When J.P. Morgan is unable to obtain a price from an internal or outside source for a particular ARS, the price column on your statement will indicate "unpriced". A description of J.P. Morgan's practices and procedures regarding ARS is available at www.jpmorgan.com/muniars.

VALUATIONS OF OVER-THE-COUNTER DERIVATIVE TRANSACTIONS: Valuations of over-the-counter derivative transactions, including certain derivatives-related deposit products, have been prepared on a mid-market basis. These valuations are sourced from the various issuers of the securities, affiliates or they are sourced from a third party valuation provider. J.P. Morgan expressly disclaims any responsibility for (1) the accuracy of the models or estimates used in deriving the valuations, (2) any errors or omissions in computing or disseminating the valuations, and (3) any uses to which the valuations are put. Valuations are provided for information purposes only and are intended solely for your own use. Please refer to the trade confirmation for details of each transaction.

UNPRICED SECURITIES: When we are unable to obtain a current value from an internal or outside source for a particular security, the price column on your statement will indicate "Unpriced." Although such securities may have value, please note that the value of a security indicated as "Unpriced" will not be included in your overall current market value as reflected on the statement.

RESTRICTED SECURITIES: Restricted Securities (typically noted as "Restricted" or "RSTD" in the security description) have not been registered under the Securities Act of 1933 and may not be "freely traded." Since restricted securities are subject to certain restrictions which may render them illiquid or less liquid than freely-tradable shares, there can be no assurance a secondary market exists. While we typically use the value of the registered/unrestricted security of the same issuer and same class for statement (and other) reporting purposes, the price realizable in a sale of the securities may be less than the "Market Value" indicated and could be zero. No attempt has been made to independently value the specific security subject to its restriction. Additionally, inclusion of pricing of these holdings will result in the aggregated value of your portfolio as reflected on this report being overstated by an amount equal to the difference (if any) between the value of the freely-traded underlying security and the actual value of your restricted shares. For additional information on pricing, please see the "Market Prices" paragraph above.
